MCMFIS Revision 16.5

Upgrade to MCMFIS software (revision 16.5) will take place 29/30 September for OCONUS Commands and 6/7 October for CONUS Commands. All MCFMIS software upgrades will be completed by 8 October 2007.

RGFSC Update

Sodexho will no longer purchase products from the Tennessee cook/chill production plant for use in Marine Corps mess halls. Sodexho is currently in negotiations with JTM Foods as a replacement vendor. On 29 August, Sodexho and USMC Program Staff conducted product taste testing. Some of the

products were acceptable; others require additional recipe modification before they will be approved. As with Tennessee cook/chill products, the JTM Foods products will require USMC approval prior to being used in Marine mess halls.

CASH MEAL SALES

Effective 1 Oct 2007, Commands are only authorized to retain 20% of the price of meals sold at the Standard Meal Rate for their base SIS (O&MMC/1106) accounts. Please note: this is a reduction from prior year retention of 30%. Please make sure all cash collection vouchers reflect 20%. The following message was released in September announcing this change:
